| | Nursing | | | | | | | To build program capacity, IHCC increased the number of student admissions |
| | | | | | | | | to two times a year instead of once a year. Enrollment numbers reflect the |
| | | | | | | | | students admitted in May of 2007. Students will be admitted to the program |
| | | | | | | | | again in November 2007. Presently, IHCC is at maximum capacity. Capacity is |
| | | | | | | | | limited by availability of qualified nursing faculty and adequate number of clinical |
| | | | | | | | | sites. The declining NCLEX-RN pass rates nationally is a concern and has |
| | | | | | | | | affected admission requirements to nursing programs. Higher admission |
| | | | | | | | | standards have influenced the number of applicants accepted. There were an |
| | | | | | | | | additional 127 completed ADN applications and 50 completed PN applications |
| 1 | | | | | | | | that did not meet admission requirements. Many of these students will work to |
| 1 | | | | | | | | improve their weak admission areas and will be admitted in a later class. |

NIACC - Mark Johnson

On the credit side, an important point: We try to accommodate students, even when we have program limits. You will see in the first attachment that in at least two cases, we enrolled students beyond program capacity, so that all qualified students are being served.

On the noncredit side, all of our listings are program needs that have not been addressed due to resource constraints.

ILCC - Mary Mohni

At times during the year we do have waiting list for certain programs – once students know there is a waiting list they may sign up for there second choice therefore waiting list for that specific program may be eliminated. We encourage students to wait for their first choice –as we will have cancellation during the year but some students want to make a choice when they visit campus.

ICCC - Marlene McComas

We feel this response from our Health Sciences Department Chair best explains the "waiting list" question and how it is handled at lowa Central: Dental Hygiene, Radiology, and nursing technically do not have "wait lists." Students wanting into these programs complete a program-specific application and submit it by a set date. These students are ranked and the top students are accepted. Alternate students are also identified in case some of the students that were accepted do not accept their position in the program.

IVCCD - Chris Russell

- * Started new programs and thereby increased capacity in Automotive Technology (Advanced Manufacturing), Medical Assisting (Life Sciences-Health Occupations), Renewable Energy Technology (Biotechnology and Alternative Energy) and Entrepreneurial/Diversified Agriculture (Life Sciences).
- * Some of these new programs have also added additional tracks as certificates, diplomas and 2 year options to meet differing student and industry timelines.
- * Increased our capacity in Health Occupations by adding career academies at three college sites.
- * Increased our capacity in Advanced Manufacturing by adding career academies in Welding/Small Engines, Machine Tool Technology, Industrial Maintenance and Construction Trades.
- * Increased our capacity in Biosciences by adding career academies in Agriculture, Biotechnology and Entrepreneurial Agriculture.
- * Increased our capacity in Manufacturing by training students in Welding and Drafting courses.

DMACC - Kim Linduska

DMACC programs (fall 2007) that are at or slightly over capacity/ number of students

Early Childhood Education: 241

Veterinary Technology: 56

Computer Aided Drafting and Design: 61

Information Technology Network Administration: 61

Electronic Systems Service Technician/Robotics and Automation: 31

Tool and Die making: 48

Graphic Technologies: 48

Civil Engineering Technology: 53

Medical Administrative Assistant: 35

Mortuary Science: 41

Phlebotomy: 18

Architectural Millwork: 17

In addition, lack of science laboratories, particularly Physics and Chemistry, prevent over 200 students from enrolling each term in science based courses that are required for many programs, or that students need for Associate of Arts or Associate of Science degrees.

Several large programs that do not require laboratory space also face restrictions on enrollment because we are simply out of daytime classroom space. Although these programs do not have enrollment caps, it is increasingly difficult for students to schedule classes at times that meet their needs. These programs are:

Business Administration: 935 students Criminal Justice: 430 students Human Services: 302 students Interpretation and Translation: 70 students
